**CLADDING MESH**

**SYMMETRIC OPAQUE WIRE MESH**  
**SDI-B02**

The SDI-B02 architectural wire mesh pattern is perfect for cladding both vertical and horizontal surfaces, offering definition and protection with style. The gentle undulations of the flat wire, combined with straight wire, create a robust, symmetric, opaque fabric with soothing qualities. Mixing wire alloys produces a subtle blend of metallic tones. This pattern is asymmetric on both sides and is now available in decorative plated finishes, with deep color transitions that further enhance this timeless material.
