SLENDER

01

SLENDER GEOMETRY REFINED

Slender is a contemporary line of urban elements defined by clarity in geometry and bold material contrast. Formed entirely in steel, this product family relies on precise folding and robust fabrication to deliver durable, elegant solutions for public space. Every element is the result of expert bending, welding, and surface finishing to ensure sharp silhouettes and long-term performance in high-use environments.

Key Features:

Monolithic Steel Construction:

All Slender products are fabricated from thick-gauge steel plates, bent and welded with precision. The seamless transitions and continuous lines define the identity of this collection.

Matte Powder Coat Finish:

Surfaces are treated with a matte powder-coated finish that resists corrosion, scratches, and UV exposure. The texture complements the strict geometry of each element.

Efficient Use of Material:

The entire line showcases structural efficiency through carefully engineered folds. Whether as seating, lighting, or support, every fold contributes to strength without excess material.

Integrated Functionality:

From bike racks to lighting bollards and waste bins, the design logic is consistent: strong U-shaped frames support additional features, always ensuring visual unity and practical performance.

Low Visual Impact, High Durability:

The name says it all—Slender occupies minimal visual space without compromising on strength. This makes it ideal for dense urban environments, plazas, or campuses where clean lines matter.

SLENDER BENCH

MINIMAL FORM.
MAXIMUM PRESENCE.

The Slender series is an exercise in restraint and refinement. Crafted entirely from precision-formed steel, this line is defined by its continuous profiles and seamless geometry. Each piece is made from a single sheet, laser-cut and bent to form clean curves and expressive silhouettes that balance lightness and strength.

All surfaces are finished in a durable black powder coat, enhancing corrosion resistance and creating a matte texture that reflects the elegance of its engineering. No exposed welds, no visual clutter—just one uninterrupted gesture in metal.

SLENDER BENCH

MINIMAL FORM.
MAXIMUM PRESENCE.

Key Features

Monolithic Construction:

Formed from a single laser-cut steel plate, each piece eliminates unnecessary joints, reinforcing structural clarity and durability.

Timeless Aesthetic:

The signature U-shape and Z-shaped bends offer universal appeal, fitting seamlessly into public plazas, institutional campuses, or private developments.

Durable Powder-Coat Finish:

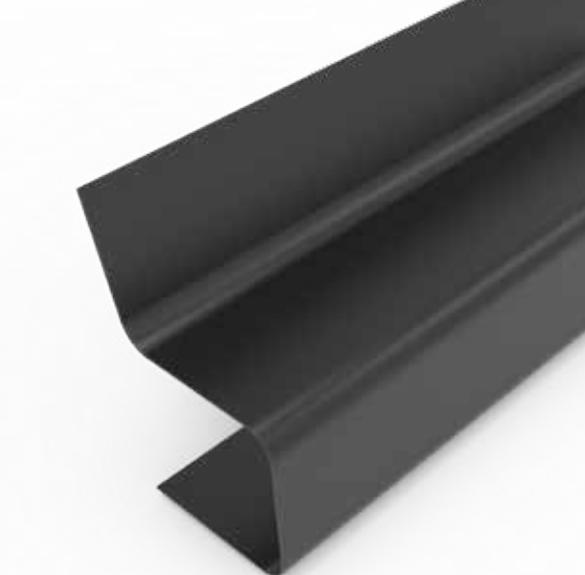

All surfaces are finished in a matte black powder coat, offering scratch resistance and a refined industrial texture.

Low-Maintenance and Tamper-Resistant:

Concealed fastening points and monoblock design reduce risk of vandalism and ease upkeep over time.

Fully Modular:

Combine benches, planters, bike racks, and lighting elements to compose unified public space systems with shared visual DNA.

SLENDER BIN

URBAN ELEGANCE.

The Slender Trash Bin combines refined aesthetics and robust steel craftsmanship. Its minimal form, defined by clean lines and graceful curves, makes it ideal for modern urban landscapes and sophisticated public spaces.

Key Features:

Steel Excellence:

Precision-fabricated from high-quality steel, ensuring durability and corrosion resistance, suitable for rigorous outdoor use.

Contemporary Perforation:

The distinctive perforated aluminum bin adds visual lightness, aiding waste visibility while preventing water accumulation.

Ease of Maintenance:

Designed for simplicity and convenience, the bin can be easily accessed and emptied, facilitating routine upkeep.

Stable & Secure:

Robust steel supports anchor the bin firmly, ensuring stability against weather and public interaction.

Sleek Finish:

Available in a premium powder-coated finish that enhances durability, resists weathering, and complements urban environments seamlessly.

SLENDER BIKE RACK

SECURE ELEGANCE IN MINIMAL FORM.

The Slender Bike Rack is designed for urban environments that value clean aesthetics and reliable functionality. Expertly fabricated from premium-grade steel, it showcases remarkable strength within a minimalist frame. Its slim yet robust profile integrates seamlessly into contemporary public spaces, enhancing rather than obstructing visual flow.

Key Features:

High-Quality Fabrication:

Precisely engineered from heavy-duty steel, ensuring exceptional durability and resistance against environmental factors.

Secure Mounting:

Thoughtful form allows bicycles to be secured efficiently, providing reliable theft deterrence.

Elegant Durability:

Finished with a high-performance, weather-resistant coating, ensuring long-lasting use with minimal maintenance.

Urban Integration:

Its understated yet modern form effortlessly complements various architectural and landscape contexts

SLENDER BIKE RACK

05

SLENDER BOLLARD

SLEEK URBAN ILLUMINATION

The Slender Bollard brings elegant illumination to urban pathways with its refined minimalist steel form. Featuring integrated LED lighting within its curved top, it subtly defines and enhances public spaces, combining function and style effortlessly.

Key Features:

Integrated LED:

High-efficiency lighting for clear and safe navigation.

Refined Form:

Continuous steel structure offers stability and elegance.

Weather Resistant:

Powder-coated finish provides lasting durability and beauty.

Low Profile Base:

Designed for flush anchoring to minimize visual clutter and ensure stability.

Vandal-Resistant Design:

Seamless surfaces and concealed fixings reduce tampering risk.

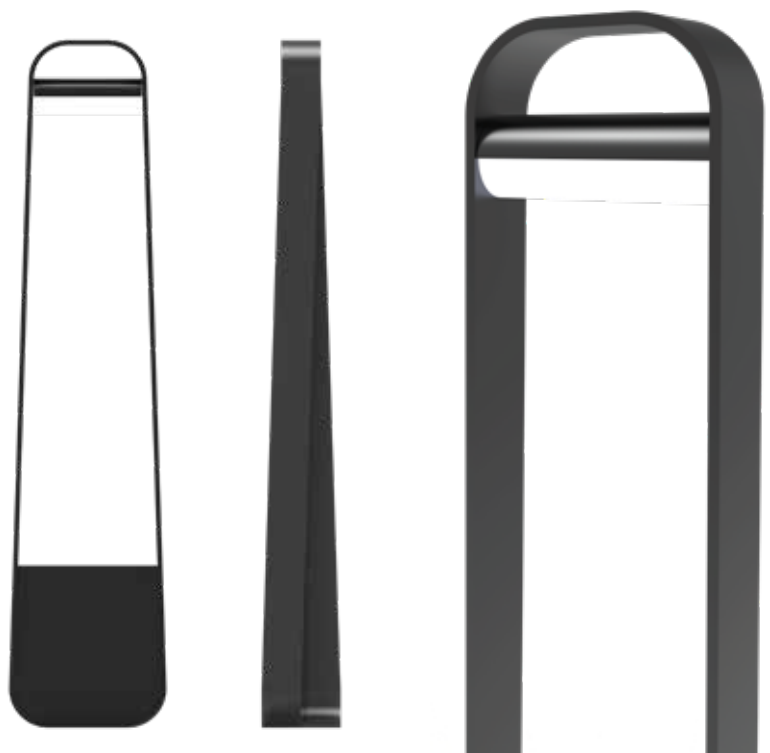

System Integration:

Matches the Slender line's language—ideal for cohesive urban layouts.
