DELTA

01

DELTA

BOLD, REFINED AND SIMPLE

The Delta line is a bold and refined urban furniture series that emphasizes precision steel craftsmanship and modular elegance. Designed for high-demand public environments, it merges structural performance with a distinctive architectural expression. Every element is fabricated to deliver clarity, comfort, and visual impact in contemporary settings.

Core Features Across the Line:

Monolithic Folded Steel Forms:

Each product is made from bent or folded carbon steel sheet, creating continuous, sculptural elements with minimal welds and visible joints.

Geometric Identity:

Triangular, faceted shapes give the line a strong architectural character and a clear visual language recognizable across benches, bins, bike racks, and bollards.

Material Honesty and Durability:

Powder-coated carbon steel offers high resistance to

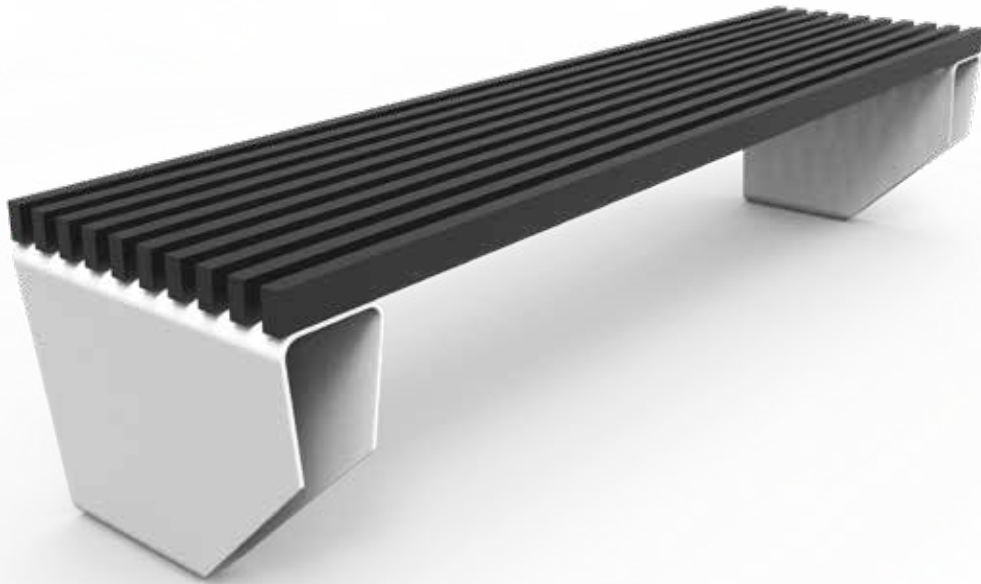

weather, abrasion, and corrosion, making every product suitable for heavy-duty public use.

Secure, User-Friendly Design:

All elements are engineered for safety, ease of use, and low maintenance — from lockable trash bins to intuitive bike parking forms.

Cohesive Modularity:

Proportions, angles, and finishes are standardized to allow seamless integration across spaces. Products can be deployed individually or as a coordinated system.

DELTA BENCH

SIMPLE YET REFINED

The Delta urban bench combines minimalism, ergonomics, and durability into a bold architectural statement. Its design uses robust steel side profiles in a folded configuration to form a clean and angular silhouette. A series of precisely spaced slats float above the frame, offering comfort without compromising on modern aesthetics. The Delta bench is designed for urban environments where longevity and visual coherence matter. Built entirely with high-quality materials and welded for structural integrity, it balances industrial strength with refined detailing.

DELTA BENCH

BOLD URBAN STATEMENT

Key Features

Bold geometry:

Angled steel end supports give the bench its distinct Delta silhouette.

Durable structure:

Fully welded steel base provides stability and vandal resistance.

Modular slat system:

CNC-aligned wood or composite slats for ergonomic comfort and drainage.

Two configurations:

Available with or without backrest for design and functional flexibility.

Outdoor-ready finishes:

Powder-coated or galvanized options withstand harsh urban climates.

Easy integration:

Designed for surface mounting or anchoring on concrete or pavers.

DELTA BENCH TYPE B

03

DELTA BIN

SCULPTURAL FUNCTIONALITY

The Delta trash bin is built for modern public spaces. A continuous folded steel frame holds a perforated cylindrical container, blending geometry and function. Ideal for streets, parks, and commercial areas.

Made for durability, it features laser-cut, cold-folded steel with minimal welds. The perforated stainless body provides airflow and keeps it visually clean.

Key Features

Folded steel frame:

Laser-cut and bent for clean geometry and structural strength.

Perforated bin body:

Improves air circulation and reduces odor accumulation.

Modular assembly:

Bolted joints for easy maintenance or part replacement.

Secure inner liner:

Optional bag ring or removable liner for clean servicing.

Weather-resistant finish:

Available in hot-dip galvanized, powder-coated, or stainless options.

Surface anchoring:

Designed for secure ground installation on various surfaces.

DELTA BIKE RACK

BEAUTY AND SECURITY

The Delta bike rack is crafted from a single bent steel plate, creating a fluid, minimalist form with no welds or joints. Its clean loop secures both the wheel and frame, offering reliable support and easy locking. Ideal for dense urban settings, this rack merges visual clarity with practical function.

Key Features

Sturdy fabrication:

Fabricated from a single laser-cut and folded steel plate

No welds:

seamless, high-strength design

Versatility:

Front-and-frame contact for secure locking

Compact:

Small footprint for efficient public space use

Finishes:

Durable powder-coated or galvanized finish for outdoor conditions

DELTA BIKE RACK

05

DELTA BOLLARD

BOLD. CLEAR. SECURE.

The Delta bollard is a minimalist barrier element built from a single folded steel plate. Its tapered geometry and faceted surfaces give it a sharp, monolithic presence that enhances any urban or commercial setting. Engineered for permanence, it is laser-cut and cold-bent for precision and strength, minimizing joints and maximizing resistance to impact and corrosion. Its sculptural profile blends security and design, serving as both a visual and physical boundary.

Key Features

Monolithic design:

made from a single bent steel plate

Compact:

Faceted geometry with a slim footprint

Optional LED Light:

A light embedded within the body adds functional elegance.

Adaptable fixing:

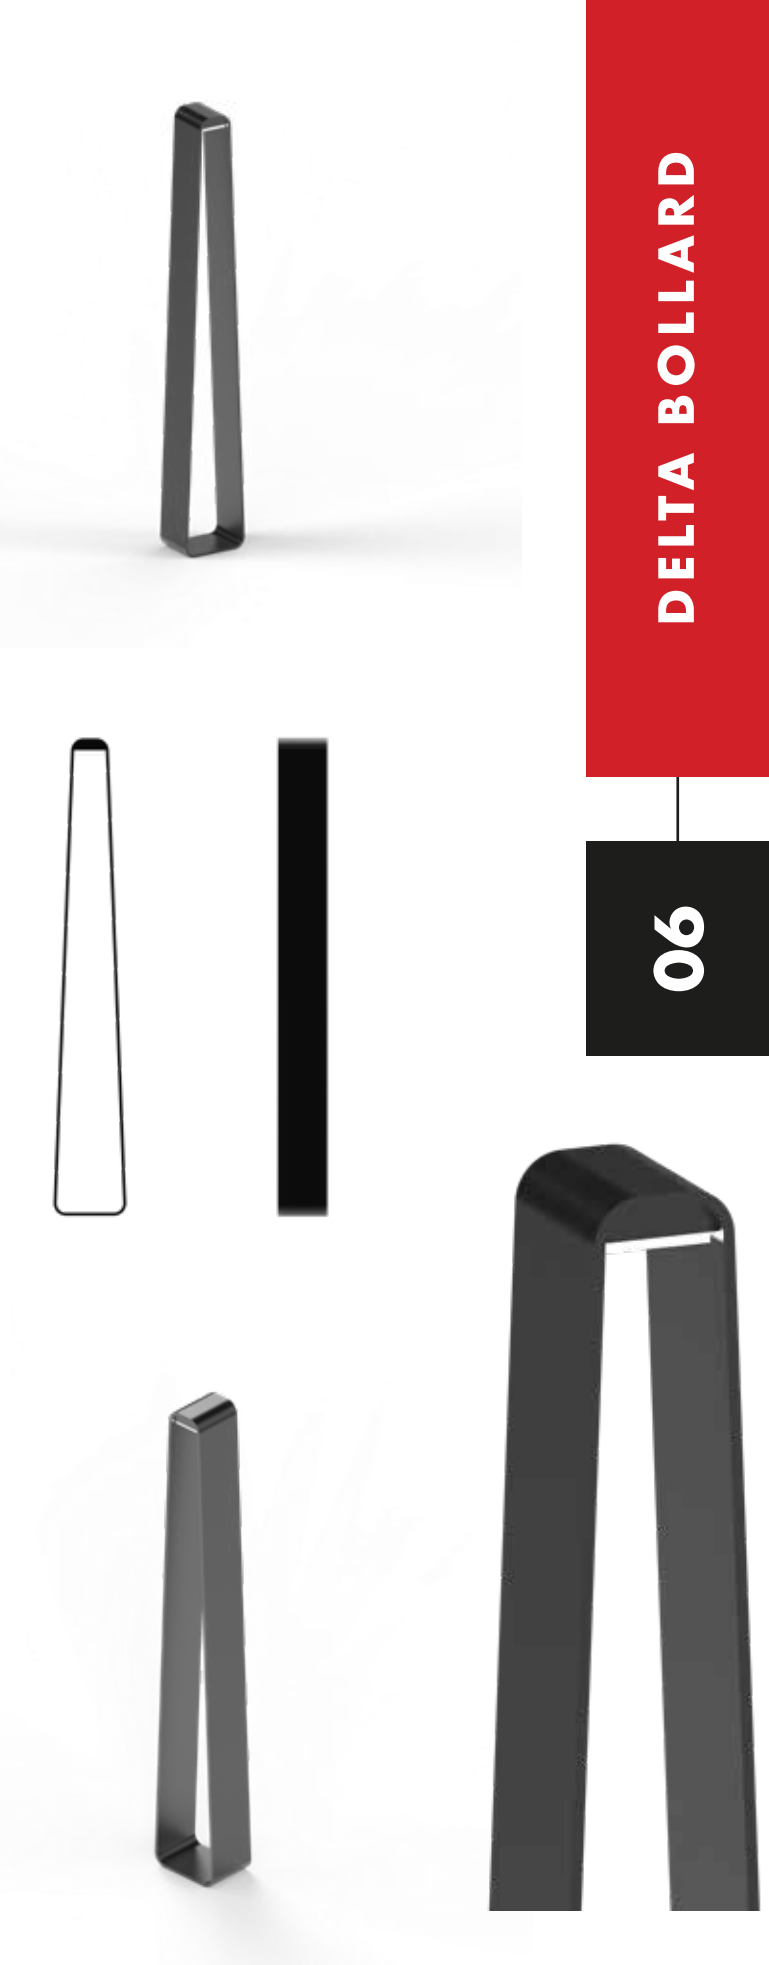

Optional anchoring for surface or embedded installation

Finishes:

Corrosion-resistant powder coating for outdoor use

Urban in mind:

Ideal for plazas, sidewalks, and controlled access points
