GEOMETRIC FACETED METAL MESH

SDI-C06

The **SDI-C06** opaque architectural wire mesh features a sequence of three square wires before the heddle frames shift. The angular form of the square wire provides distinct definition, setting this mesh pattern apart from round wire designs. It is commonly used in applications such as vertical or horizontal cladding. Its precision and strength also make it ideal for cutting into custom shapes or complete cutouts, offering flexibility in design.

SPECIFICATIONS

Percentage Open 0.0 %	Overall Thickness 0.189	Crimp Style Coutout-Ready Wire	Aspect Ratio 1.88:1
Opening Limitation 0.000	Weight 3.10 lbs./sq. ft.	Max Length 120 Inches (A)	Max Height 60 Inches (B)

Material:

Stainless Steel

Finish:

Null
